IOS CHAPTER CHEATS [#&ED@N]
HOW TO INCREASE ENERGY FOR TRAVEL TOWN IPAD

Click Here!

i do enjoy this game but i do have some comments that could make the game better i had this order where i needed the sewing kit to get the cloth to make the clothes i had a little over 100 energy and did get a single sewing kit i do understand that is not the main item and the side ones are supposed to be a little harder to get i wish they could do it so that you don t have to waste so much energy to not even get a single one i do find myself trying to complete an order the whole day and not even finishing with the odds that the items come out i wish they could have a higher chance to get those another thing is the energies i wish they were not so expensive compared to other games the amount of energy you get in a day doesn t match the orders i can t even complete daily quests because i m stuck on one order that brings me to my next point the amount of daily quests is ridiculous i have at least one day where the daily quests are 22 and the max is 63 000 coins that need to be earned i can t even get 20 000 coins in a day most times i feel there needs to be more reasonable with the amount of coins that need to be earned to complete a quest now i do enjoy this game it is fun and i like the different items you unlock at each level and the idea of building a town mark dickinson has extensive international property development experience leading diverse businesses in the united kingdom

australia and america including the athletes village for the 2012 olympic games he is a chartered civil engineer and was an officer in the british army the game was fun at first but i ve had many glitches over the past few months i assume this is coming from new updates first i haven t been about to play for the past 3 5 days because as soon as i get on it says there is an internet connection issue and then loads forever and nothing happens this is 100 not an internet issue on my end and i don t think there s a way that i can fix this problem since the game will completely load in and then when i get to the board it starts having the issue second i ve had a one one my production items just copy itself for no reason it s a low level one and i have no use for it since i have completely leveled up the production item that is was supposed to be it s been sitting in my extra storage space for months now so it s literally useless and taking up space third issue is sometimes i will be playing and some of my items will turn invisible like they are still their and i can move them but i can t see them really annoying because i think i have more space on my board and then i have to figure out switch item is glitching and it s just this big hassle this is more of an opinion but i hate how you guys changed the some of the skins for past items they looked fine before and it kind of looks worse only leaving this review to see if i can get these issues fixed because i do enjoy playing the game other than these issues i ve been having in the beginning you will only have limited space to merge and some objects are covered by sand so focus on the same items that can unblock more space as you level up more rooms will be freed and you can have a wider range of objects on the merge board
